The Bank has formulated prepared Internal Capital Adequacy Assessment Process ('ICAAP') which has a sound and comprehensive policy and process for evaluating the Bank's capital commensurate with the overall risk profile, business projections and capital management strategies.

It covers the capital management policy of the Bank, set out the process for assessment of the adequacy of capital to meet regulatory requirements, support current and future activities and meet the Pillar I and material Pillar II risks to which the bank is exposed to.

The Banks develops its strategic, business and capital plans covering five year horizon. Based on this long term strategy, the annual budget of the bank is prepared considering the current economic and business outlook. These two long and short term plans ensure that adequate levels of capital and optimum mix are maintained by the Bank to support its strategy and business requirements.

The Risk Management Policy along with the Liquidity Management Framework of the Bank provides the comprehensive stress testing guidelines for credit, market, liquidity and other risk faced by the Bank. Stress testing takes into account extreme but plausible scenarios to assess the bank's resilience to adverse circumstances and resultant impact on the Bank's risk profile and capital position. This ensures that the bank has robust and forward looking capital planning and risk management process. Scenario assessment such as the fall in the financial markets, a falling trend in the assets quality, volatile liquidity condition, negative changes in macroeconomic factors etc., are taken into consideration while carrying out the stress testing.
